ENRIQUE GABRIEL SANTOS GUADALUPE

SOFTWARE DEVELOPMENT | IT INFRASTRUCTURE

Guadalajara, Jalisco, Mexico | (+52) 33 1149 1473 | enkikegpe99@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with professional experience in IT infrastructure, data center operations, server administration, and technical support at Foxconn and IBM. Experienced in troubleshooting server hardware, network configuration, infrastructure documentation, and IT asset management. Also developing hands-on skills in backend development using Python, Java, SQL, and JavaScript, with an interest in software engineering, AI, and automation.

PROFESSIONAL EXPERIENCE

Foxconn Guadalajara, Mexico
Test Analyzer *Jan 2026 – Jul 2026*

- Diagnosed and troubleshot server hardware failures in a production environment.
- Performed BIOS and firmware updates and validated hardware functionality.
- Replaced defective components and performed hardware maintenance.
- Analyzed system issues and documented troubleshooting procedures and results.
- Configured and tested network connections.

IBM Guadalajara, Mexico
IT Infrastructure Intern *Jan 2025 – Mar 2025*

- Managed an inventory of 300+ IT infrastructure devices using NetBox.
- Created technical documentation for data center infrastructure following internal standards.
- Organized and maintained network racks in a data center environment.
- Installed operating systems and performed basic system configuration.

IBM Guadalajara, Mexico
IT Infrastructure Intern *Feb 2024 – Apr 2024*

- Supported data center infrastructure organization and maintenance activities.
- Assisted with technical documentation and infrastructure management.
- Gained practical experience with enterprise IT environments and operational procedures.

EDUCATION

B.S. in Artificial Intelligence and Data Science *2025 – Present*
CUGDL, Universidad de Guadalajara

Higher University Technician in Information Systems *2024 – 2025*
CUCEI, Universidad de Guadalajara

Professional Technologist in Information Systems *2020 – 2024*
Polytechnic University of Guadalajara

TECHNICAL SKILLS

Back-End: Python, FastAPI, Django, Java, SQL.

Front-End: JavaScript, React, HTML, CSS, Bootstrap.

Tools & Infrastructure: Git, GitHub, Docker, Linux, AWS, NetBox, Pytest.

Data Science & Analysis: Pandas, Polars, NumPy, Matplotlib, Seaborn, Scikit-learn.

Languages: English (B2)

TECHNICAL PROJECTS

Aura Jalisco – Backend API & Solar Data Analysis Platform
Python, FastAPI, PostgreSQL, SQLAlchemy, Pandas, Scikit-learn

- Developed a functional backend application for managing and analyzing solar and meteorological datasets.
- Implemented REST API endpoints for dataset management, CSV processing, and statistical analysis.
- Integrated PostgreSQL and SQLAlchemy for persistent data storage and database operations.
- Processed historical solar and meteorological data obtained from NASA POWER.
- Implemented a Decision Tree Regression model to estimate solar irradiance using historical data.
- Evaluated model performance using MAE, RMSE, and R^2 metrics.

Expense Manager API – RESTful API
Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Alembic, Docker

- Developed a RESTful API for managing personal income and expenses.
- Implemented database operations using SQLAlchemy and data validation with Pydantic.
- Managed database schema changes and migrations using Alembic.
- Used Docker to configure the development environment.

ProLink – Professional Networking Platform
Django, React, PostgreSQL, JWT

- Developed a full-stack web application inspired by professional networking platforms.
- Built a Django REST API and integrated it with a React frontend.
- Implemented JWT authentication, protected routes, and session management.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Data Visualization with Matplotlib** — DataCamp.
- **Supervised Learning with scikit-learn** — DataCamp.
- **Regression with statsmodels in Python** - DataCamp
- **React & TypeScript – Practical Guide.** - Udemy

Meta Back-End Developer – Selected Coursework

- Python Programming, Version Control, Introduction to Databases for Back-End Development, and Django Web Framework.

IBM P-TECH Program *2020 – 2024*

- Training in Python, web development, Design Thinking, and professional skills.
- Participation in collaborative projects and teamwork methodologies.
