ENRIQUE GABRIEL SANTOS GUADALUPE

B.S ARTIFICIAL INTELLIGENCE & DATA SCIENCE

(33)11491473 • enkikegpe99@gmail.com • Portfolio • LinkedIn • GitHub • Guadalajara, Jal.

Artificial Intelligence and Data Science student with experience in technology infrastructure, data center support, and server administration gained at IBM and Foxconn. Participant in the IBM P-TECH program, with knowledge of Python, Typescript/Javascript, SQL, and Linux, focused on backend development, AI, and automation.

SKILLS

- **Front-End**
  - JavaScript
  - React
  - HTML
  - CSS
  - Bootstrap
- **Back-End**
  - Python
  - FastAPI
  - Django
  - Typescript
  - Node.Js
  - SQL
- **Tools**
  - Git/GitHub
  - Linux
  - Docker
  - Pytest (Testing)
  - AWS
- **Data Analysis**
  - Pandas
  - NumPy
  - Matplotlib
  - Seaborn
- **Languages**:
  - English (B2)
  - Spanish

PROFESSIONAL EXPERIENCE

IBM — Intern February 2024 – April 2024
January 2025 – March 2025

- Managed an inventory of 300+ devices using NetBox.
- Created technical documentation for data center infrastructure based on internal standards.
- Organized and maintained network racks in a data center environment.
- Installed operating systems and performed basic system configuration.

Foxconn — Failure Analysis Technician January 2026 – July 2026

- Troubleshot and repaired server hardware issues.
- Performed firmware and BIOS updates.
- Tested and validated hardware functionality.
- Replaced faulty components.
- Analyzed hardware and system-related issues.
- Documented incidents and troubleshooting results.
- Configured and tested network connections.

EDUCATION

- B.S. in Artificial Intelligence and Data Science — CUGDL. 2025 – Present
- Higher University Technician in Information Systems — CUCEI. 2024 – 2025
- Professional Technologist in Information Systems — Polytechnic University of Guadalajara 2020 – 2024

CERTIFICATIONS & PROGRAMS

- **IBM P-TECH Program (2020 – 2024)**
  - Technology training program developed in collaboration with IBM.
  - Training in Python, Web Development, Design Thinking, and professional skills.
  - Participation in projects and collaborative work methodologies.
- **Meta Back-End Developer**
  - Python Programming
  - Version Control
  - Introduction to Databases for Back-End Development
  - Django Web Framework
- **Bootstrap 5 and SASS — Practical Guide**
- **React & TypeScript — Practical Guide**

PROJECTS

- **Data Analyzer API** — REST API – Python, FastAPI, PostgreSQL, Pandas
  - REST API for uploading and analyzing CSV files.
  - Used FastAPI and PostgreSQL to manage the data.
  - Used Pandas to analyze datasets and generate basic statistics.
  - Used Docker for the development environment.

- **Expense Manager API** — REST API
  - Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Alembic, Docker
  - REST API for managing income and expenses.
  - Built the backend with FastAPI and PostgreSQL.
  - Used SQLAlchemy for database operations and Pydantic for data validation.
  - Used Alembic for database migrations and Docker for the development environment.
- **ProLink** — Professional Networking Platform – Django, React, PostgreSQL, JWT
  - Full-stack web application inspired by LinkedIn.
  - Built a Django REST API and connected it to a React frontend.
  - Implemented JWT authentication and protected routes.
  - Added session management and communication between the frontend and backend through REST APIs.
- **SIMP** — Facial Recognition System – Python — School Project
  - Developed a facial recognition system for student access and attendance control.
  - Integrated a database to store and manage student information.
  - Designed the system to support a more organized access and attendance process.
- **Technical Project** — Linux – Social Service Project — 2025
  - Worked with Linux system administration and basic server management.
  - Gained hands-on experience with virtualization and service deployment in a controlled environment.
