ENRIQUE GABRIEL SANTOS GUADALUPE

Software Developer | Backend Development

Guadalajara, Jalisco, Mexico | (+52) 33 1149 1473 | enkikegpe99@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with hands-on experience in backend development, IT infrastructure, server administration, and hardware troubleshooting. Experienced in developing RESTful APIs and backend applications using Python, FastAPI, Django, PostgreSQL, and SQLAlchemy, with additional knowledge of JavaScript, TypeScript, and React. Previously completed two internships at IBM and worked at Foxconn, gaining practical experience in enterprise IT environments, data center operations, and technical support. Interested in backend and full-stack development, software engineering, and IT infrastructure.

TECHNICAL SKILLS

Front-End: JavaScript, React, HTML, CSS, Bootstrap.

Back-End: Python, FastAPI, Django, TypeScript, Node.js, SQL.

Tools & Infrastructure: Git, GitHub, Docker, Linux, AWS, NetBox, Pytest.

Data Science & Analysis: Pandas, Polars, NumPy, Matplotlib, Seaborn, Scikit-learn.

Languages: English (B2), Spanish (native)

PROFESSIONAL EXPERIENCE

Foxconn Guadalajara, Mexico

Failure Analysis Technician *Jan 2026 – Jul 2026*

- Diagnosed and troubleshot server hardware failures in a production environment.
- Performed BIOS and firmware updates and validated hardware functionality.
- Replaced defective components and performed hardware maintenance.
- Analyzed system issues and documented troubleshooting procedures and results.
- Configured and tested network connections.

IBM Guadalajara, Mexico

IT Infrastructure Intern *Jan 2025 – Mar 2025*

- Managed an inventory of 300+ IT infrastructure devices using NetBox.
- Created technical documentation for data center infrastructure following internal standards.
- Organized and maintained network racks in a data center environment.
- Installed operating systems and performed basic system configuration.

IBM Guadalajara, Mexico

IT Infrastructure Intern *Feb 2024 – Apr 2024*

- Supported data center infrastructure organization and maintenance activities.
- Assisted with technical documentation and infrastructure management.
- Gained practical experience with enterprise IT environments and operational procedures.

EDUCATION

B.S. in Artificial Intelligence and Data Science *2025 – Present*

CUGDL, Universidad de Guadalajara

Higher University Technician in Information Systems *2024 – 2025*

CUCEI, Universidad de Guadalajara

Professional Technologist in Information Systems *2020 – 2024*

Polytechnic University of Guadalajara

TECHNICAL PROJECTS

Aura Jalisco – Backend API & Solar Data Analysis Platform
Python, FastAPI, PostgreSQL, SQLAlchemy, Pandas, Scikit-learn

- Developed a functional backend application for managing and analyzing solar and meteorological datasets.
- Implemented REST API endpoints for dataset management, CSV processing, and statistical analysis.
- Integrated PostgreSQL and SQLAlchemy for persistent data storage and database operations.
- Processed historical solar and meteorological data obtained from NASA POWER.
- Implemented a Decision Tree Regression model to estimate solar irradiance using historical data.
- Evaluated model performance using MAE, RMSE, and R^2 metrics.

Expense Manager API – RESTful API
Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Alembic, Docker

- Developed a RESTful API for managing personal income and expenses.
- Implemented database operations using SQLAlchemy and data validation with Pydantic.
- Managed database schema changes and migrations using Alembic.
- Used Docker to configure the development environment.

ProLink – Professional Networking Platform
Django, React, PostgreSQL, JWT

- Developed a full-stack web application inspired by professional networking platforms.
- Built a Django REST API and integrated it with a React frontend.
- Implemented JWT authentication, protected routes, and session management.

SIMP – Facial Recognition System
Python, Database Integration

- Developed a facial recognition system for student identification and attendance management.
- Integrated a database to store and manage student information.

Linux System Administration – Technical Project *Linux, Virtualization, Server Administration*

- Gained hands-on experience with Linux system administration and basic server management.
- Worked with virtualization and service deployment in a controlled environment.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Introduction to Data Visualization with Matplotlib** — DataCamp.
- **Data Transformation with Polars** — DataCamp.
- **Bootstrap 5 and SASS – Practical Guide.** - Udemy
- **React & TypeScript – Practical Guide.** - Udemy

Meta Back-End Developer – Selected Coursework

- Python Programming, Version Control, Introduction to Databases for Back-End Development, and Django Web Framework.

IBM P-TECH Program *2020 – 2024*

- Training in Python, web development, Design Thinking, and professional skills.
- Participation in collaborative projects and teamwork methodologies.
